

# YEALINK LTE-SIP PHONE

Transcend Business Calling With  
Wireless Freedom for all PBX feature

T6X is a desktop phone with an nano SIM card slot based on the Android 12 operating system. Within the signal coverage of 4G carrier network, T6X can be deployed wherever it needs to be used, completely free from the restrictions of wired network and Wi-Fi.

## PREMIUM FEATURES

### Plugin and Play

Complete registration and deployment through the **Mobile network by plugging in the SIM card.**

### Low deployment Cost

Saving cost from both **hardware purchase and labor deployment cost.** Network cable, router and switch is no longer necessary. No need for professional on-site deployment.

### HD Voice Quality

HD voice communication experience and is equipped with the latest Yealink optimized HD voice technology, including Yealink Acoustic Shield technologies.

### Wireless Hotpot

LTE Phone can provide networks for other devices (POS machines, cash registers, computers), **realizing a one-stop service in a small environment network deployment plan.**

### Highly Reliable Connection

Calls can be handled by T67 via the LTE **network or through Wi-Fi or LAN network cable lines.** Best choice for emergency agency like hospital, government, etc

### Dual Number Available

**IMS and SIP account registration are both supported.** Dual account switching with one click, easy and comfortable
